

NCI Data Services Notifications

NCI Data Services - Notification of changes to data services or data access

This page provides information on planned changes to data services and available datasets that are expected to affect user access to data. This includes notification of data flagged for decommissioning and changes to services. It is not intended to provide live service monitoring information.

If you are experiencing any issues with data access or data services that are not listed here then please check the NCI [Live Status](#) page to confirm availability of the "/g/data" filesystems. If the filesystems are operational then please contact help@nci.org.au and include "Data Services" in the subject line.

Announcements

01 Oct 2021 **DECOMMISSIONED** The <https://nrm-erddap.nci.org.au/> data server will be decommissioned on Tuesday 05 Oct 2021 during NCI's quarterly maintenance. Note that the NRM data that has been available through this server is also accessible via NCI's THREDDS Data Server: https://dapds00.nci.org.au/thredds/catalogs/ua6_4/catalog.html. If you have any questions, please contact help@nci.org.au (refer to 'Data Services' in the subject line).

30 Jul 2021 **DECOMMISSIONED** Multiple data catalogue services now decommissioned. The following older catalogue services have been decommissioned due to security issues. Please see our main Data Catalogue (geonetwork.nci.org.au) for information about our data collection holdings. If you have any questions about these services, please contact help@nci.org.au (please refer to 'Data Services' in the subject line).

- <http://geonetworkrr9.nci.org.au>

29 Jul 2021 **CHANGE** **Service change: macho and wigglez TAP data services.** To align these services with current security practices, https access to these services is the only option from now; any access to http endpoints will be redirected to https. Some software tools do not support following redirects so you may need to update your endpoints to use https instead. If you have any questions about this service, then please contact help@nci.org.au (please refer to 'Data Services' in the subject line).

16 Jul 2021 **CHANGE** **Service change: thredds data service - TDS** (a.k.a dap and dapds00.nci.org.au). To align thredds with current security practices, https access to the TDS is the only option from now; any access to http endpoints will be redirected to https. Some software tools do not support following redirects so you may need to update your endpoints to use https instead. If you have any questions about this service, then please contact help@nci.org.au (please refer to 'Data Services' in the subject line).

13 Jan 2021 **DECOMMISSIONED** The Geoscience Australia National Geophysical Compilations datasets under <http://dapds00.nci.org.au/thredds/catalogs/rr2/catalog.html> have now been decommissioned from THREDDS as well as locally within project space rr2. For the most recent version of these datasets, please see our [Geoscience Australia Geophysics Reference Data Collection](#) data catalogue entry for more details.

05 Jan 2021 **DECOMMISSIONED** The dap-wms.nci.org.au data server has been decommissioned. If you have any questions about this service then please contact help@nci.org.au (please refer to 'Data Services' in the subject line). For updated access information about the National Geophysical Compilations or ASTER datasets that were accessible on this server, please see our Data Catalogue for data access information:

Recent notifications:

17 Dec 2020 **COMPLETE** **Planned Outage: thredds** (a.k.a dap and dapds00.nci.org.au). There will be a short outage of ~5 minutes per service (dap and dapds00) on Thursday 17th December between the hours of 8am and 10am while we migrate these services to the new NCI Cloud. If you have any questions about this outage then please contact help@nci.org.au (please place 'Data Services: thredds' in the subject line).

16 Dec 2020 **COMPLETE** **Planned Outage: metoffice-mirror** (part of accessdev). There will be an outage to metoffice-mirror service on Wednesday 16th December between the hours of 11am and 4pm while we perform preliminary tasks ahead of the future migration to the new NCI Cloud. If you have any questions about this outage then please contact help@nci.org.au (please place 'Data Services: accessdev' in the subject line).

15 Dec 2020 **COMPLETE** **Planned Outage: erddap**. There will be an outage to nrm-erddap service on Tuesday 15th December between the hours of 10am and 6pm while we migrate this service to the new NCI Cloud. If you have any questions about this outage then please contact help@nci.org.au (please place 'Data Services: erddap' in the subject line).

11 Dec 2020 **COMPLETE** **Planned Outage: Skymapper/ASVO service migration**. There will be a short outage of ~5 minutes per service (skymapper, astro, wigglezta, machotap) on Friday 11th December between the hours of 12pm and 2pm while we migrate these services to the new NCI Cloud. If you have any questions about this outage then please contact help@nci.org.au (please place 'Data Services: Skymapper/ASVO' in the subject line).

26 Nov 2020 Due to hardware issues, several data collection projects located on the **gdata1a** filesystem will be offline for up to 5 days, commencing 5 pm Thursday 26 November. Refer to this [/g/data status page](#) for the full list of affected projects and their availability status. This outage affects data access via our THREDDS, GSKY, SkyMapper and ESGF data services.

30 Jun 2020 NCI is decommissioning the http://dapds00.nci.org.au/thredds/catalogs/ua8_COSIMA/catalog.html. This dataset is now available from <http://dapds00.nci.org.au/thredds/catalogs/cj50/catalog.html>. Please see the [COSIMA Model Output Collection](#) catalogue for more information about the datasets available or contact help@nci.org.au if you have any additional questions.

02 Apr 2020 The <http://remote-sensing.nci.org.au/> and <http://rs.nci.org.au/> data access website has been decommissioned. If you have any questions about this service then please contact help@nci.org.au (please refer to 'Data Services' in the subject line). You can continue to access these datasets from NCI's THREDDS Service <http://dapds00.nci.org.au/thredds/catalog/u39/public/data/catalog.html>. For assistance please contact help@nci.org.au.
